

### CUSTOM LUBRICATION STORAGE ROOM —

Simplifying storage in a custom space for your business.

Finding areas in a plant to store fluids, that are isolated and free of contamination can be difficult, not to mention prohibitive to space and cost. ForFluids **Custom Lubrication Storage Rooms** allow you to establish a safe and efficient remote base of operations for storing, dispensing, and managing your industrial lubricants. Our fully customized, turnkey portable lubrication storage rooms provide the perfect site for oil handling, storage, and filtration.

## FEATURES

### CONTROLLED SPACE

Fluids stored in a temperature regulated room (complete with insulated roll-up garage door).

### PORTABLE/MOVABLE

Can be installed on any surface, arriving fully assembled— just needs power/air connection.

### POWER/LIGHT OPTIONS

Inner lighting can display LED (shown) and cage lighting. Power the room through electric, air, or custom options.

### INTEGRATED FILTRATION

Electric and pneumatic transfer pump options; Systems are piped to recycle through pumps.

### SOLID CONSTRUCTION

A heavy-duty carbon steel body coated in marine grade, corrosion-resistant paint.

## BENEFITS

### COST EFFECTIVE

Total compliant lube room without having to modify existing structures.

### PLUG + PLAY

Units come pre-wired and pre-piped; you can filter and dispense hours after delivery.

### SAFETY

Fluids are stored in a secure, insulated steel room with options for fire protection.

### ENVIRONMENTAL

Integrated room spill control protection, and guarded from elemental exposure.
